ONE TECHNICIAN ONE TOOL™

Lift King is best known for our industry-leading "one technician, on tool" product, the Lift King. While we have expanded our product line, we always approach each new design with the same safety, durability, and performance in mind."

Today, we offer a wide array of light and heavy duty products including paint stands, dollies, and more!

The Lift King is the safest, most efficient way to remove or install a pickup box.

LIGHT DUTY PACKAGE

The Lift King Light Duty Package comes with everything needed for one technician of any size to remove or install OEM pickup boxes of all sizes, including 8' dually boxes.

Once the pickup box is ready for removal, the Lift King Main Component quickly converts from the stored position to the working position without needing any tools. The Main Component is then connected to the pickup box, and the box is removed in less than five minutes including the original set up time. After removal, the box can easily be moved around the shop.

The box attachment also comes with a set of rear connecting straps for boxes without tailgate hinge pins, or a box with extreme rear damage. In most cases, rear bumpers are not required to be removed.

**Check out Lift King's
demonstration video to see just
how easy our lift is to use.**

MAIN COMPONENT
WITH BOX ATTACHMENT

PACKAGE INCLUDES:

| **Main Component**

| **Box Attachment**

| **Bushing Kit**

SKU: LKLD

- One technician, one tool operation
- Improve safety by avoiding technician strain and injury
- Improve productivity with one technician instead of four
- Mitigates the risk of damage
- Remove boxes with little clearance from the cab damage free
- Lift the box to the desired height when performing repairs
- Cut labor time in half when performing fuel pump replacements

LIGHT DUTY PLUS PACKAGE

PACKAGE INCLUDES:

- | Main Component
- | Box Attachment
- | Bushing Kit
- | Bushing Kit Holder
- | Box Dolly

SKU: LKLDP

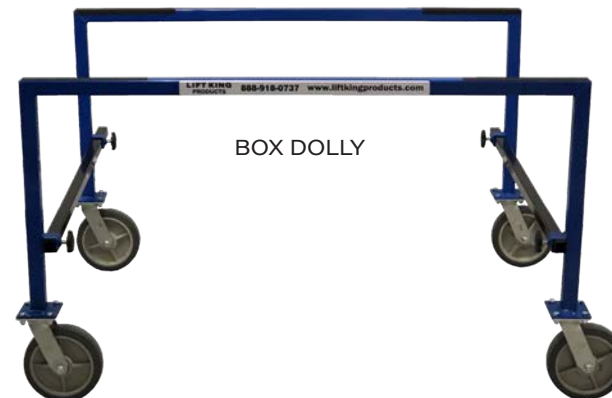

The Lift King Light Duty Plus Package comes with everything included in the Lift King Light Duty Package plus a Bushing Kit Holder and Box Dolly.

After removal, the box can be lowered onto the Lift King Box Dolly that is included in this package. By utilizing the Box Dolly, other technicians can perform removals and installations by keeping the lift free at all times.

INCLUDED:
BUSHING KIT, BUSHING KIT HOLDER,
AND BOX ATTACHMENT

- | Stabilizer Kit
- | Bumper Attachment
- | Hitch Attachment
- | Hood Attachment
- | Door Attachment
- | Box Dolly

SKU: LKLDW

The Lift King Light Duty Works Package comes with everything needed for one technician to remove or install OEM pickup boxes of all sizes, including 8' dually boxes.

It also comes with other attachments, to remove bumpers, hitches, automotive hoods, and automotive, sprinter, and semi cab doors. This package also includes a Stabilizer Kit which eliminates most of the front-end bounce of the box,

while performing heavy repairs or changing out box sides while on the Lift King Main Component.

After the removal of a pickup box, the box can be lowered onto the included Box Dolly. By utilizing the Box Dolly, other technicians can perform removals and installations by keeping the lift free at all times.

HEAVY DUTY PACKAGE

PACKAGE INCLUDES:

| **Main Component**

| **Semi Hood Attachment**

SKU: LKHD

SAFETY:

Good technicians are hard to find and should be protected as an asset. The Lift King will eliminate physical strain and protect the technician from injury.

PRODUCTIVITY:

Pay one technician to do the job instead of four.

IMPROVE QUALITY:

The Lift King will allow a technician to remove or install the semi hood with precise adjustments when removing or inserting pins, or the brackets that secure the hood to the truck. Quality is improved by avoiding human error and possible damage to the hood.

The Lift King Heavy Duty Package comes with everything needed for one technician of any size to securely remove or install semi hoods of all sizes, including fiberglass and aluminum. Once the semi hood is disconnected and ready for removal, the Lift King Main Component quickly converts from the stored position to the working position without needing any tools. The Main Component connects to the semi hood, and the hood is removed in less than five minutes including the original set up time.

SEMI HOOD ATTACHMENT

THIS PACKAGE COMES WITH TWO FRONT MOUNTING OPTIONS:

Tilt Scoop Mount: This application requires the grill to be removed. It allows the technician to remove the semi hood, quickly, safely, and with little to no effort. This is a great option when performing collision repairs, fiberglass, or aluminum repair. The technician can tilt the hood to the perfect angle and perform repairs in the most visible and comfortable position.

Non-Tilt Mount: This application does not require the grill to be removed. It allows the technician to remove the semi hood, quickly, safely, and with little effort. This is a great option when performing mechanical repairs that require the hood to be removed.

HEAVY DUTY PLUS PACKAGE

PACKAGE INCLUDES:

| **Main Component**

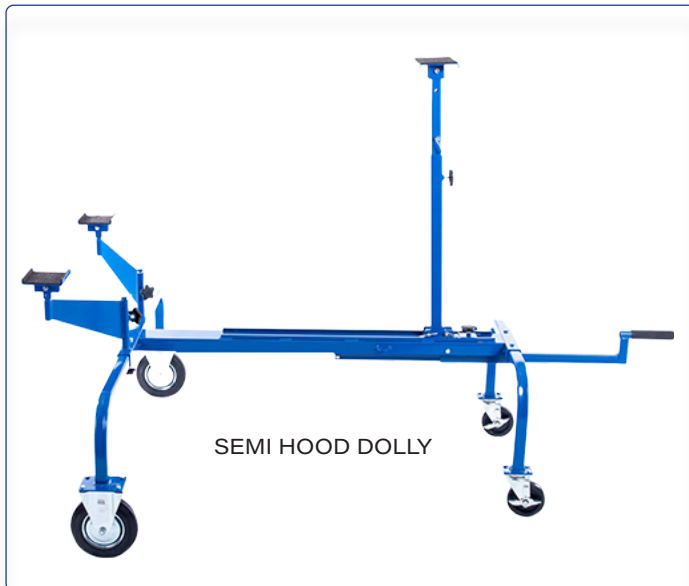

| **Semi Hood Attachment**

| **Semi Hood Dolly**

SKU: LKHDP

The Lift King Heavy Duty Plus Package comes with everything included in the Lift King Heavy Duty Package plus a Semi Hood Dolly.

After removal, the semi hood can be lowered onto the Lift King Semi Hood Dolly that is included in this package. By utilizing the included Semi Hood Dolly, other technicians can perform removals and installations by keeping the lift free at all times.

HEAVY DUTY WORKS PACKAGE

PACKAGE INCLUDES:

FIFTH WHEEL ATTACHMENT

DOOR ATTACHMENT

SEMI HOOD DOLLY

The Lift King Heavy Duty Works Package comes with everything needed for one technician of any size to securely remove or install semi hoods. It also comes with other attachments, allowing a technician to remove or install fifth wheels, trailer doors, & automotive, sprinter, & semi cab doors.

After the removal of a semi hood, the semi hood can be lowered onto the Lift King Semi Hood Dolly that is included in this package. By utilizing the Semi Hood Dolly, other technicians can perform removals and installations by keeping the lift free at all times.

COMBO PACKAGE

PACKAGE INCLUDES:

- | Main Component
- | Box Attachment
- | Bushing Kit
- | Semi Hood Attachment

SKU: LKCB

BENEFITS:

- One technician, one tool operation
- Improves safety by avoiding injury
- Improves productivity by utilizing one tech
- Increases quality by avoiding risk of damage
- Perform repairs at the desired height
- Move the box or hood around with ease

The Lift King Combo Package is a great option for shops that work on both automotive and commercial trucks. This package comes with everything needed to remove and install pickup truck boxes including 8' dually's and semi truck hoods of all sizes including fiberglass and aluminum. This package has everything that comes in the Light Duty Package and Heavy Duty Package. Both applications are done without human lifting of any type, and only one technician of any strength or size for removal and installation.

Once the pickup box or semi hood is disconnected and ready for removal, the Lift King Main Component converts from the stored position to the working position within one minute and with little effort. There are no tools needed. The Main Component is then connected to the pickup box or semi hood, and the box or hood is removed in less than five minutes including the original set up time.

COMBO PLUS PACKAGE

PACKAGE INCLUDES:

- | Main Component
- | Box Attachment
- | Bushing Kit
- | Bushing Kit Holder
- | Semi Hood Attachment
- | Box Dolly
- | Semi Hood Dolly

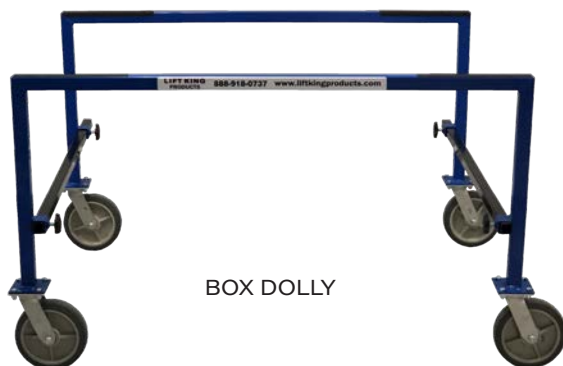

SKU: LKCBP

INCLUDED:
BUSHING KIT, BUSHING KIT HOLDER,
AND BOX ATTACHMENT

The Lift King Combo Plus Package comes with everything needed to remove or install pickup boxes and semi hoods.

BOX DOLLY

The Lift King Box Dolly and Semi Hood Dolly are also included in this package for easy navigation around the shop.

SEMI HOOD DOLLY

COMBO WORKS PACKAGE

PACKAGE INCLUDES:

- | Main Component
- | Box Attachment
- | Bushing Kit
- | Bushing Kit Holder
- | Stabilizer Kit
- | Hitch Attachment
- | Bumper Attachment
- | Hood Attachment
- | Door Attachment
- | Semi Hood Attachment
- | Fifth Wheel Attachment
- | Trailer Door Attachment
- | Box Dolly
- | Semi Hood Dolly

SKU: LKCBW

The Lift King Combo Works Package comes with everything needed to remove or install pickup boxes, hitches, hoods, semi hoods, fifth wheels, bumpers of all size, and doors on passenger vehicles, sprinter vans, semi trucks, and semi trailers.

This package also includes a Stabilizer Kit for additional support while doing heavy repairs or changing box sides.

The Lift King Box Dolly and Semi Hood Dolly are also included in this package for easy navigation around the shop.

INCLUDED:
BUSHING KIT, BUSHING KIT HOLDER,
AND BOX ATTACHMENT

FIFTH WHEEL PACKAGE

The Lift King Fifth Wheel Package is a great option when removing or installing fifth wheels for commercial and pickup trucks.

One technician can easily, and safely, remove or install fifth wheels without the need for additional technicians, forklifts, overhead chains, or other unsafe practices.

This application will INCREASE SAFETY, PRODUCTIVITY, and QUALITY.

The included Fifth Wheel Rotisserie Stand is the perfect solution for technicians when inspecting, rebuilding, or repainting fifth wheel plates both light and heavy duty.

It is designed with a 360-degree rotation feature, and the ability to securely lock into the desired position. The Lift King Fifth Wheel Rotisserie Stand comes with a durable powder coat finish, takes up minimal floor space, and comes with swivel and brake casters. Like all Lift King products, it is built much heavier duty for longevity and is built in the USA.

PACKAGE INCLUDES:

- | Main Component
- | Fifth Wheel Attachment
- | Fifth Wheel Rotisserie Stand

SKU:LKFW

WHEEL DOLLY PACKAGE

This Wheel Dolly Package has multiple applications, allowing the dolly to attach to the hub, regular tire placement, and it works great for the new roller/temporary shop wheels. No worries about damaging the rockers and lower panels.

KEY FEATURES AND BENEFITS:

- Built with heavy-duty steel and four high quality swivel casters to ensure longevity, durability, stability, and mobility
- Includes hub assembly & roller/temporary wheel mounts
- Excellent for moving electric vehicles
- Avoid damage to the rockers and lower panels
- Easily move the vehicle around the facility and free up your bays

PACKAGE INCLUDES:

- | Wheel Dolly
- | Hub Assembly Mount Kit
- | Roller/Temporary Wheel Mount Kit

SKU: LK4080PKG

MULTIPLE APPLICATIONS

Temporary Wheels

Hub Assembly Mounts

PAINTER'S PACKAGE

PACKAGE INCLUDES:

- | Fender Paint Stand
- | Extreme Stand
- | Deluxe Paint Stand
- | Easy Panel Stand

SKU: LKPP

FENDER PAINT STAND

EXTREME STAND

EASY PANEL STAND

DELUXE PAINT STAND

FENDER PAINT STAND: This paint stand is very adjustable, allowing technicians to paint fenders while avoiding shadows and uneven coverage. This paint stand also works on most fenders with an inner lip. It folds up by removing one pin, so this stand can easily be hung on a wall mount or on a Lift King Box Dolly / Fender Stand Rack.

EXTREME STAND: This multi-use stand is perfect for every collision, paint, and restoration shop. This stand works on any panel that has bolt or pilot holes. The four arms and six connecting points are independently adjustable to fit and secure all makes and designs. The stand has telescopic height adjustment to give the painter their desired height. It also can adjust the panel in a vertical or horizontal position, including anywhere in between. This stand has a complete 360-degree rotation of the panel with locking positions every inch. The Extreme Stand can also be folded and hung by simply removing a pin.

DELUXE PAINT STAND: This stand is built much heavier than most paint stands on the market and has great stability and durability with an adjustable height from 5' to 7'. The top center bar can hang 250 lbs. without any bowing or flexing. The stand comes with eight panel hooks that slide vertically and horizontally. The hooks can also be flipped over or turned on an angle for the best hooking point. The center bar can be detached by removing two snap pins when hanging large panels. This is a great universal paint stand for trim parts, hoods, doors, fenders, bumpers, liftgates, tailgates, and many other panels of all shapes and sizes.

EASY PANEL STAND: This stand is built much heavier than most competing paint stands for greater stability and durability. The Easy Panel Paint Stand is a great choice when painting several different panels including hoods, doors, tailgates, liftgates, hatches, and more. This stand works on any panel that can be connected to its three connecting points.

**** More information on these paint stands can be found in the Paint Stands section of the catalog.**

MOTORCYCLE PAINT STAND PACKAGE

Package Includes:
3 Main Stands, 8 Attachments & Our MC Attachment Rack

The Lift King MC Paint Stand Package is the perfect solution for all motorcycle painters. The Main Stands have a great stance to keep all parts stable, and four swivel brake casters that allow the stand to be moved around easily. The "T" bar that connects to the Main Stand is telescopic, providing the perfect height position for the highest quality outcome.

All attachments are designed to securely hold the specified panel, while leaving the underside

and edges exposed for excellent coverage. The design also allows for perfect panel placement to help the painter avoid spray overlapping. These stands allow painters to do a much better paint job.

The MC Paint Stand Package comes with a durable powder coat finish and takes up minimal floor space when stored on our MC Attachment Rack. Like all Lift King products, it is built in the USA and made heavy duty for longevity.

PACKAGE INCLUDES:

- | **3 Main Stands**
- | **Fairing Attachment**
- | **Side Cover Attachment**
- | **Saddle Bag Attachment**
- | **Helmet Attachment**
- | **Split Tank Attachment**
- | **Tour Pack Attachment**
- | **Gas Tank Attachment**
- | **Fender Attachment**
- | **MC Attachment Rack**

SKU: MCPSP

PAINT BY MUNCH SERIES PACKAGE

PACKAGE INCLUDES:

- | Main Base
- | Easel Stand
- | Skateboard Stand
- | Helmet Stand

SKU: PBM1000

Juan "Munch" Gonzalez

The Paint by Munch Series Package is perfect for every artist and non-artist when airbrushing, drawing, or working on art projects. It has a telescopic adjustable height, tilt and an adjustable removable painting tray equipped with an airbrush holder.

The main easel adjustment will securely accommodate up to 36 inches in height and comes with LED lighting.

The Lift King Skateboard Stand is designed to accommodate both short and long boards. By using this stand, the painter can spray skateboards, helmets or any project without any obstructions or movement.

The main base has a great stance for stability and comes with swivel brake casters. This Easel Stand also has a bench/table mount feature available. Like all Lift King products, it is built heavy duty for longevity and is built in the USA.

KEY FUNCTIONS:

- | Telescopic And Tilt Adjustments
- | Removable Paint Tray
- | Air Brush Holder
- | Stable Design with Swivel Brake Casters

MAIN COMPONENT

SKU: LK4000

The Lift King Main Component is designed to **INCREASE:**

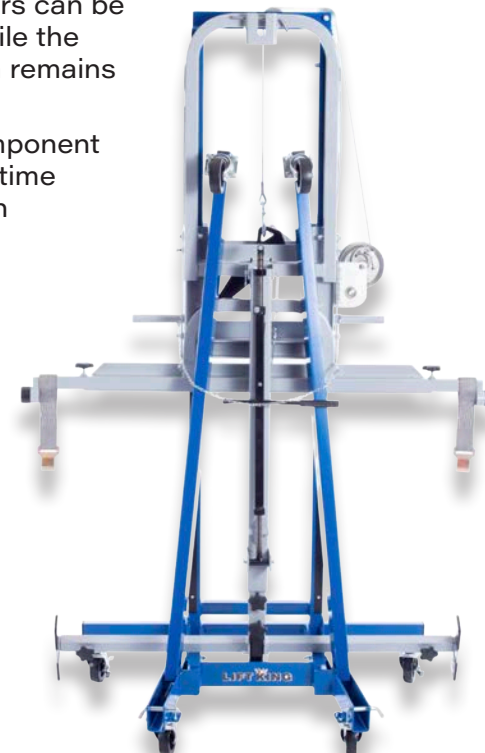

SAFETY by protecting the technician from physical strain or injury
PRODUCTIVITY by reducing the need of multiple technicians to only one
QUALITY by reducing the chance for damage.

The Main Component accommodates all of our lift attachments, allowing one technician to perform multiple functions.

Some applications include the removal or installation of any size pickup boxes, camper toppers, and semi and automotive hoods, doors, and fifth wheel plates. Additional attachments continue to be designed and introduced to our product line.

KEY BENEFITS:

- One technician, one tool operation
- Steel construction & powder coat finish
- Only requires a 3'x3' floor print when in the stored position
- Set up and tear down in seconds
- Equipped with all necessary safety features and warning decals
- Rated for 600lbs and passed testing at 1,000lbs
- 1,500lb brake winch for easy lifting
- Avoid physical strain, and mitigate risk of injury
- Improve quality by avoiding the possibility of damage to the customer's vehicle
- Collision repairs can be performed while the damaged item remains on the lift
- The Main Component pays for itself time and time again

SAFETY PRODUCTIVITY QUALITY

EV PRO

SKU: LK4000EV

The Lift King EV Pro Lift brings the latest technology to the Lift King Products line up. The EV Pro comes with an electric winch and state-of-the-art vacuum system designed for removing, installing, lifting, and maneuvering panels up to 500lbs. It works on any panels that can connect to the four vacuum pads.

The EV Pro has safety features on the vacuum system such as a gauge to ensure a safe and solid connection and an alarm that will sound upon a loss of vacuum pressure.

The electric winch comes with a hand remote so the technician can make height adjustments while inspecting the positioning of the items being lifted. The main connection point is fully

adjustable to accommodate several designs. This is a great option when lifting all types of products within the weight and size limitations.

Unlike the Lift King Main Component, the EV Pro does not accommodate any other attachments. This lift is not the same as the Lift King Main Component. This lift is designed exclusively for the included vacuum system.

The Lift King EV Pro comes with a durable powder coat finish, takes up minimal floor space when stored, and comes with swivel brake casters. Like all Lift King products, it is built in the USA and is heavy duty for longevity.

DOOR ATTACHMENT

SKU: LK5200

The Lift King Door Attachment comes with everything needed to quickly connect to the Main Component. This attachment allows one technician to perform the removal or installation of doors on cars, trucks, semis, and all types of automotive and commercial vehicles such as sprinter doors.

This application increases labor productivity and mitigates the risk of injury.

This is the safest and most efficient way to remove or install automotive, commercial, and fleet truck doors of all sizes; large and small.

There are THREE key benefits that the Lift King Main Component and Door Attachment offers compared to the typical door jack.

- Improved quality by allowing technician to get the door into the perfect, precise position.
- Reaching height allows technician to remove or install doors while the vehicle is on the frame rack.
- This attachment allows the Main Component to lift much larger doors such as sprinter doors and semi-truck doors.

BUMPER ATTACHMENT

SKU: LK5210

The Lift King Bumper Attachment comes with everything needed to connect to the Main Component for one technician to perform the removal and installation of bumpers.

This attachment works for steel, aluminum, and plastic bumpers and bumper covers. The Bumper Attachment works on bumpers of all sizes, including commercial trucks such as semis.

WHEEL ATTACHMENT

SKU: LK5350

The Lift King Wheel Attachment is a great feature for all collision and mechanical shops performing repairs that require a wheel or tire to be removed or installed.

This attachment is designed to accommodate wheels and tires of any size and weight. It is a great feature when removing and installing automotive, commercial truck, commercial trailer, and several other wheel or tire designs without any human lifting or strain.

The Lift King Wheel Attachment is designed with rollers on the main chassis for easy wheel or tire rotation to perfectly align the bolt pattern during installation.

The main chassis is adjustable to accommodate the width of the wheel or tire.

The upper support arm is also adjustable to accommodate the height of the wheel or tire and to secure the wheel or tire into a firm, safe position.

The Lift King Wheel Attachment works on wheels and tires on vehicles as small as a typical economy car and as large as a super single on a commercial semi-truck or trailer. This is also a great feature for moving large, heavy wheels or tires around the shop with ease. The average lifting height from the floor to the bottom of the tire is approximately 48 inches.

BOX ATTACHMENT

SKU: LK4053

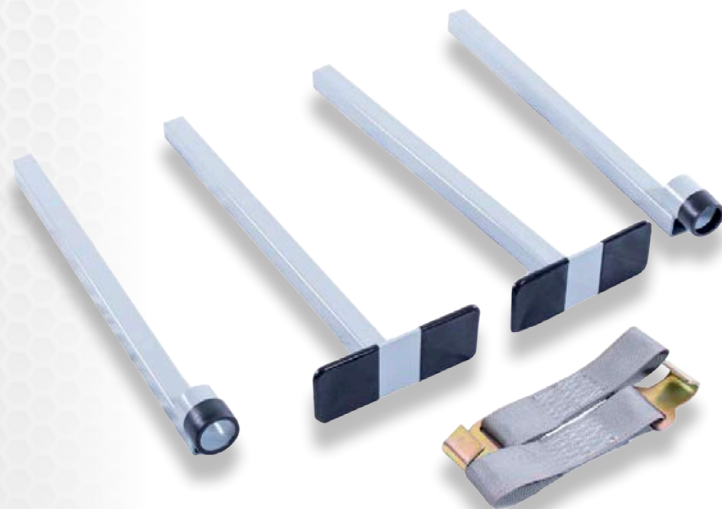

The Lift King Box Attachment comes with everything needed to connect to the Main Component for one technician to perform the removal and installation of pickup boxes without any human strain or lifting.

This application greatly reduces the risk of injury and strain, increases labor productivity, and mitigates damage.

This is the best way to remove or install pickup boxes when changing fuel pumps, performing collision repairs, restoration work, and paint work.

Shops that don't have the Lift King Main Component and Box Attachment use other unsafe practices such as forklifts, engine hoists, overhead cranes, or multiple technicians.

The Lift King is the safest and most efficient way to remove or install a pickup box.

BUSHING KIT

SKU: LK4056

Our bushings are made of aluminum. They come with the Box Attachment to provide additional support for the removal or installation of pickup boxes.

The bushings are designed to fit into the tailgate hinge mounts and reduce unwanted movement for a snug fit to the tailgate hinge pin.

STABILIZER KIT

SKU: LKSK

The Lift King Stabilizer Kit is a great feature when performing collision repairs to a pickup box.

This feature allows the technician to eliminate most of the front-end bounce of the box, while doing heavy repairs or changing out box sides while on the Lift King Main Component.

TOPPER ATTACHMENT

SKU: LK4054

The Lift King Topper Attachment connects to the Main Component quickly without needing any tools.

One technician can easily remove or install a pickup topper with ease while reducing labor costs and increasing safety to the technician.

The Lift King Topper Attachment works with any style, including fiberglass and aluminum toppers.

HOOD ATTACHMENT

SKU: LK5400

The Lift King Hood Attachment comes with everything needed to quickly connect to the Main Component without needing any tools. This attachment allows one technician to perform the removal and installation of hoods on cars, trucks, SUV's, vans, and other automobiles.

One technician can quickly connect the Lift King Hood Attachment to a hood, adjust with a slight amount of upward pressure, remove the bolts connecting the hood to the hinges without the hood dropping down into the cowl or windshield.

The hood attachment also has a ton of adjustability. It allows for the hood to be tilted in a complete upward or downward position, and a complete 360-degree rotation to find the best possible position for performing repairs.

TILT BOOM ATTACHMENT

SKU: LK4036

The Tilt Boom Attachment is designed to tilt a pickup box in an upward position for under box repairs, sandblasting, restoration, painting, or rust proofing. Once the box is tilted in the upward position, the safety pin that is included is to be inserted to lock it into position for the operator's safety.

The Tilt Boom Attachment connects to the Main Component in the matter of seconds by setting it in the designated position with the addition of one pin. The Tilt Boom makes it easy to tilt the pickup box in an upward position with only one operator on no physical lifting.

This attachment is a must-have asset for restoration, custom, and hot rod shops.

HITCH ATTACHMENT

SKU: LK5220

The Lift King Hitch Attachment comes with everything needed to connect to the Main Component for one technician to perform the removal and installation of hitches.

This attachment is a great option when installing any tow hitches on cars, trucks, and SUVs. It allows one tech to securely mount a tow hitch into a secure position without any physical strain.

SEMI HOOD ATTACHMENT

SKU: LK4037

The Lift King Semi Hood Attachment comes with the parts needed to connect to the Main Component for one technician to perform the removal or installation of semi hoods of all types without any physical lifting or strain.

THIS PACKAGE COMES WITH TWO FRONT MOUNTING OPTIONS:

Tilt Scoop Mount: This application requires the grill to be removed. It allows the technician to remove the semi hood, quickly, safely, and with little to no effort. This is a great option when performing collision repairs, fiberglass, or aluminum repair. The technician can tilt the hood to the perfect angle and perform repairs in the most visible and comfortable position.

Non-Tilt Mount: This application does not require the grill to be removed. It allows the technician to remove the semi hood, quickly, safely, and with little effort. This is a great option when performing mechanical repairs that require the hood to be removed.

Both applications make removing a semi hood a very EASY, FAST, and SAFE process for one technician. They keep the hood very secure and allow the technician to easily relocate the hood anywhere in the shop.

SAFETY: Good technicians are hard to find and should be protected as an asset. The Lift King will eliminate physical strain and protect the technician from injury.

PRODUCTIVITY: Pay one technician to do the job instead of four.

QUALITY: The Lift King will allow a technician to remove or install the semi hood with precise adjustments when removing or inserting pins, or the brackets that secure the hood to the truck. Quality is preserved by avoiding human error and possible damage to the hood.

The Lift King is the safest and most efficient way to remove or install a semi hood.

SAFETY PRODUCTIVITY QUALITY

FIFTH WHEEL ATTACHMENT

SKU: LK5100

The Lift King Fifth Wheel Attachment connects to the Main Component within seconds. This is a great option when removing or installing fifth wheels for commercial and pickup trucks.

One technician can easily, and safely, remove or install fifth wheels without the need for additional technicians, forklifts, overhead chains, or other unsafe practices.

This application will INCREASE SAFETY, PRODUCTIVITY, and QUALITY.

Main component not included

TRAILER DOOR ATTACHMENT

SKU: LK5250

The Lift King Trailer Door Attachment comes with everything needed to quickly connect to the Main Component allowing one technician to perform the removal or installation of trailer doors on dry vans or refrigerated trailers. The Trailer Door Attachment attaches to Lift King Main Component in the matter of seconds without needing any tools.

The lower mounting brackets are adjustable from side to side and are designed to mount under the trailer door. The upper mounting brackets are designed to channel each side of the trailer door approximately three feet below the top of the door. The upper mounting brackets are adjustable to best accommodate thick or thin doors and can be adjusted to create a firm grip.

This application is designed for one technician to remove or install trailer doors without the need of additional technicians, forklifts, or other unsafe practices.

This application increases labor productivity and mitigates the risk of technician injuries. This is a great way to remove or install trailer doors of all sizes; large or small. The Lift King is the safest and most efficient way to remove or install trailer doors.

FIFTH WHEEL ROTISSERIE STAND

SKU: LK5150

The Lift King Fifth Wheel Rotisserie Stand is the perfect solution for technicians when inspecting, rebuilding, or repainting fifth wheel plates both light and heavy duty.

It is designed with a 360-degree rotation feature, and the ability to securely lock into the desired position. The Lift King Fifth Wheel Rotisserie Stand comes with a durable powder coat finish, takes up minimal floor space, and comes with swivel and brake casters. Like all Lift King products, it is built much heavier duty for longevity and is built in the USA.

FENDER PAINT STAND

SKU: FPS5100

The Lift King Fender Paint Stand is an inexpensive, simple, and well-designed stand. This stand works on most fenders that have an inner lip.

It is adjustable so the painter can angle the fender into the best position for stability, painting, and height.

One key benefit compared to other stands on the market is that there are no pins or clips needed to hold the fender in position. This will improve the quality of the paint job by avoiding shadows and uneven coverage. The paint and clear coat will have an even thickness to avoid future flaking and chipping.

This paint stand stores with very little space needed. When storing, pull one pin, fold the stand, and hang on a wall mount or a Lift King Accessory Rack.

**Shops that
have purchased
this stand
typically buy more
after using it.**

**Our customers
use this stand
for many other
applications
such as bumpers,
trim parts,
mirrors, and
even doors.**

EXTREME STAND

SKU: LK5500

The Lift King Extreme Stand is perfect for every collision, paint, and restoration shop. This stand is a favorite among our customers.

There are several features that separate this stand from others.

SOME OF THE MANY BENEFITS:

- Takes the place of several stands with its multi-use design
- Completely adjustable to fit all types of panels
- Telescopic height adjustment to best fit the desired height for the painter
- Adjust the panel to any position: vertical, horizontal, and anywhere in between
- Complete 360 rotation of the panel with locking positions every inch.

**WHEN NOT IN USE,
PULL ONE PIN AND
COLLAPSE THE STAND
TO HANG ON A
WALL MOUNT**

DELUXE PAINT STAND

SKU: LK5570P

The Lift King Deluxe Paint Stand is designed as a universal paint stand for use in and out of the paint booth. It is built much heavier than most paint stands on the market and has great stability and durability.

The height is adjustable from 5' to 7'. The top center bar can hang 250 lbs. without any bowing or flexing. The stand comes with eight panel hooks that slide from side to side, are telescopic, and can be flipped over or turned on an angle for the best hooking point. The center bar can be detached by removing two snap pins when hanging large panels.

It has four swivel brake casters for easy moving and secure positioning.

This is a great universal paint stand for trim parts, hoods, doors, fenders.

EASY PANEL STAND

SKU: PS6300

The Lift King Easy Panel Stand is designed as a universal paint stand for use, both in and out of the paint booth. It is built much heavier than most competing paint stands for greater stability and durability.

The Easy Panel Stand is a great choice when painting all types of autobody panels including hoods, doors, liftgates, tailgates, deck lids, and several other panels. It is also a great stand for restoration shops that work on old vehicles with much larger and heavier panels.

The four swivel brake casters make moving panels around the shop easy when on the Easy Panel Stand.

BOX DOLLY

SKU: LK4055

The Lift King Box Dolly is a well-built dolly that holds pickup boxes of all sizes, including 8' dually boxes.

The dolly is adjustable and comes with 8" rubber brake casters that make moving large pickup boxes around the shop or in and out of the paint booth an easy task.

Unlike most dollies on the market, the Lift King Box Dolly can be broken down in less than a minute by loosening four star knobs and removing the two center bars. This dolly can be stored with little to no floor space needed. It can easily be hung on a wall mount or one of the Lift King Accessory Racks.

SEMI HOOD DOLLY

SKU: LK4035

The Lift King Semi Hood Dolly is designed to allow one technician to easily maneuver a semi hood around the shop.

The two front arms swivel and are adjustable to accommodate most hood designs. The rear stabilizer bar is telescopic to adjust to most inner hood designs and to better balance the hood into the best working or stored position. This dolly comes with large front casters to make pushing the hood over paint booth grates an easy task.

This dolly is a great option when repairing, painting, storing, and moving semi hoods.

If you have a busy commercial truck repair shop and own a Lift King Main Component with a Semi Hood Attachment, this dolly is a great option to keep your lift available for other removal or installation jobs.

VEHICLE DOLLY

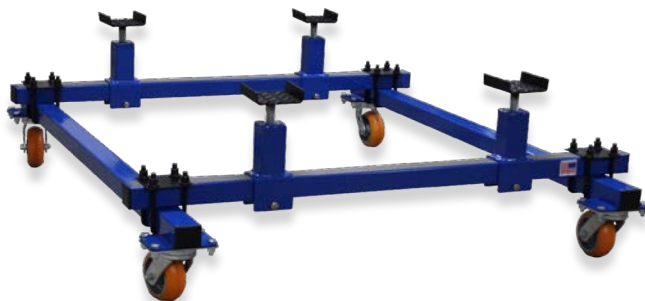

SKU: LK4090

The Lift King Vehicle Dolly is built heavy duty and designed for vehicles that are inoperable or undergoing frame replacements, fabrication, or restoration.

This dolly is highly adaptable. The side bars can be adjusted by length and width. The four connecting points slide from side to side and are also telescopic, allowing it to fit many different frame sizes and designs.

The brake casters are made with high-grade, soft rubber that makes moving a full-size car or truck an easy job.

THE VEHICLE DOLLY HAS A MAXIMUM WEIGHT CAPACITY OF 5,000LBS.

MAX. WEIGHT 5,000LBS

WHEEL DOLLY

SKU: LK4080

The Lift King Wheel Dolly is one of a kind. It is a great feature for all collision shops, restoration shops, hot rod shops, and home use for the hobbyist.

This dolly is universal and designed to move inoperable vehicles safely and securely around the shop with ease. It accommodates all automotive wheel sizes, comes with a hub adapter, and even works on small temporary wheels. It comes with a durable powder coat finish and swivel brake casters designed for heavy loads.

The Lift King Wheel Dolly is much different than all others. Like all Lift King products, it is built much heavier for longevity and is built in the USA.

MULTIPLE APPLICATIONS

Temporary Wheels

Standard Wheels

Hub Assembly Mounts

EASEL STAND

PAINT BY MUNCH SERIES

SKU: PS7000

The Lift King Easel Stand is perfect for every artist and non-artist when airbrushing, drawing, or working on art projects. It has a telescopic adjustable height, tilt, and an adjustable, removable painting tray equipped with an airbrush holder. The main easel adjustment will securely accommodate up to 36 inches in height and comes with LED lighting.

The main base has a great stance for stability and comes with swivel brake casters. This Easel Stand also has a bench/table mount feature available. Like all Lift King products, it is built heavy duty for longevity and is built in the USA.

SKATEBOARD STAND

PAINT BY MUNCH SERIES

SKU: PS7085

The Lift King Skateboard Stand is perfect for airbrushing skateboards. Artists and non-artists appreciate the versatility of the stand. It has a telescopic adjustable height, tilt and an adjustable removable painting tray equipped with an airbrush holder.

The main base has a great stance for stability and comes with swivel brake casters. The Lift King Skateboard Stand is designed to accommodate both short and long boards. Like all Lift King products, it is built heavy duty for longevity and is built in the USA.

HELMET STAND

PAINT BY MUNCH SERIES

SKU: PS6700

The Lift King Helmet Stand comes with everything needed to quickly connect to the Main Stand without needing any tools. It is designed to secure a helmet in the best positions for stability.

By using this stand, the painter can spray the helmet without any obstructions or movement. The Helmet Stand is very easy to use and is an excellent addition for shops that do any custom, paint, or air brush work to motorcycle helmets.

MAIN STAND

SKU: MC6100

The Lift King MC Main Stand is inexpensive and simple to use. It is built durable and designed for longevity.

The stand has 3" swivel brake casters that make moving parts an easier task. The upper adjustment bar is telescopic, allowing the painter to raise or lower the parts into the perfect position for the highest quality outcome.

This product is an excellent addition for shops that do any custom, paint, or air brush work on motorcycle parts.

Main Stand is for Motorcycle Attachments. Attachments sold separately.

GAS TANK ATTACHMENT

SKU: MC6200

The Lift King MC Gas Tank Attachment comes with everything needed to quickly connect to the Main Stand without needing any tools. It is designed to secure the gas tank in the best position for stability.

By using this attachment, the painter can spray the top and underside of the tank, without any obstructions or movement. The Gas Tank Attachment is very easy to use and is an excellent addition for shops that do any custom, paint, or air brush work on motorcycle gas tanks.

**This attachment does NOT come with a Main Stand.*

SPLIT TANK ATTACHMENT

SKU: MC6250

The Lift King MC Split Tank Attachment comes with everything needed to quickly connect to the Main Stand without needing any tools. It is designed to secure the split tanks in the best position for stability.

By using this attachment, the painter can spray the split tanks, including the lower edges, without any obstructions or movement.

The Split Tank Attachment is very easy to use and is an excellent addition for shops that do any custom, paint, or air brush work on motorcycle tanks.

**This attachment does NOT come with a Main Stand.*

FENDER ATTACHMENT

SKU: MC6300

The Lift King MC Fender Attachment comes with everything needed to quickly connect to the Main Stand without needing any tools. It is designed to secure the fenders in the best position for stability.

By using this attachment, the painter can spray the fenders, including their lower edges, without any obstructions or movement. The Fender Attachment is very easy to use and is an excellent addition for shops that do any custom, paint, or air brush work on motorcycle fenders.

**This attachment does NOT come with a Main Stand.*

TOUR PACK ATTACHMENT

SKU: MC6400

The Lift King MC Tour Pack Attachment comes with everything needed to quickly connect to the Main Stand without needing any tools. It is designed to secure the trunk and lid in the best positions for stability.

By using this attachment, the painter can spray the trunk and lid, including their lower edges, without any obstructions or movement. The Tour Pack Attachment is very easy to use and is an excellent addition for shops that do any custom, paint, or air brush work on motorcycle tour packs.

**This attachment does NOT come with a Main Stand.*

FAIRING ATTACHMENT

SKU: MC6500

The Lift King MC Fairing Attachment comes with everything needed to quickly connect to the Main Stand without needing any tools. It is designed to separately secure the inner and outer fairings in the best positions for stability.

By using this attachment, the painter can spray both fairings, including their lower edges, without any obstructions or movement. The Fairing Attachment is very easy to use and is an excellent addition for shops that do any custom, paint, or air brush work on motorcycle fairings.

**This attachment does NOT come with a Main Stand.*

SADDLE BAG ATTACHMENT

SKU: MC6600

The Lift King MC Saddle Bag Attachment comes with everything needed to quickly connect to the Main Stand without needing any tools. It is designed to secure the saddle bags and lids in the best positions for stability.

By using this attachment, the painter can spray the saddle bags and lids, including their lower edges, without any obstructions or movement. The Saddle Bag Attachment is very easy to use and is an excellent addition for shops that do any custom, paint, or air brush work on motorcycle saddle bags.

**This attachment does NOT come with a Main Stand.*

SKU: MC6700

The Lift King MC Helmet Attachment comes with everything needed to quickly connect to the Main Stand without needing any tools. It is designed to secure a helmet in the best positions for stability.

By using this attachment, the painter can spray the helmet without any obstructions or movement. The Helmet Attachment is very easy to use and is an excellent addition for shops that do any custom, paint, or air brush work on motorcycle helmets.

**This attachment does NOT come with a Main Stand.*

SIDE COVER ATTACHMENT

SKU: MC6800

The Lift King MC Side Cover Attachment comes with everything needed to quickly connect to the Main Stand without needing any tools. It is designed to secure the side covers in the best position for stability.

By using this attachment, the painter can spray the side covers, including their lower edges, without any obstructions or movement. The Side Cover Attachment is very easy to use and is an excellent addition for shops that do any custom, paint, or air brush work on motorcycle side covers.

**This attachment does NOT come with a Main Stand.*

MC FRAME STAND

SKU: MC7000

The Lift King MC Frame Stand comes with everything needed to quickly connect to the Motorcycle Frame without needing any tools. It is designed to secure the frame in the best positions for stability.

By using this stand, the painter can work on the frame and spray the frame without any obstructions or movement. The Frame Stand is very easy to use and is an excellent addition for shops that do any custom, paint, or air brush work to motorcycles.

BUSHING KIT HOLDER

SKU: LK4056H

The Lift King Bushing Kit Holder has a magnetic base so that it can be mounted anywhere on the lift. This Bushing Kit Holder can be quickly relocated at any time. This is a great way to keep the bushings immediately accessible.

BOX DOLLY / FENDER STAND RACK

SKU: LK5300FD

The Box Dolly / Fender Stand Rack is a great way to store the Lift King Box Dolly and Fender Paint Stand when not in use. This product will help conserve space and keep equipment organized.

This rack is equipped with four swivel brake casters that make relocating a Box Dolly and Fender Paint Stand anywhere in the shop an easy task.

This Rack Stores:

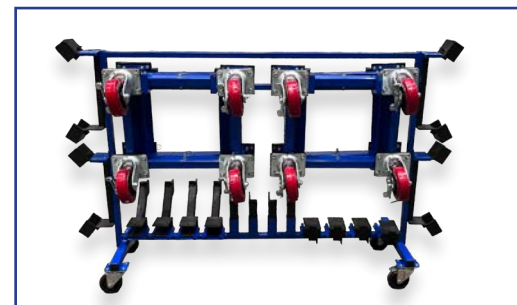

- 1 x Box Dolly
- 1 x Fender Paint Stand

WHEEL DOLLY RACK

SKU: PS7100

Holds 4 Wheel Dollies and all Mount Kits.

HEAVY DUTY PARTS CART

SKU: PC1000

The Lift King Heavy Duty Parts Cart is designed much different than other parts carts on the market. It is built to safely accommodate double the weight with more than triple the life expectancy compared to competitive parts carts.

The Heavy Duty Parts Cart is offered as a three or four shelf parts management system both built with the same main structure. This allows for shelves to be added or removed at any time. The 45" X 24" tight mesh shelves have a locking mechanism when in the stored position for best safety practices. Individual shelves are also available for purchase.

Additional standard features include four parts hooks, two rear mounted bumper racks, and a rear panel mount designed to secure larger panels such as hoods, doors, decklids, tailgates, fenders, and more. It also comes with swivel braking casters for easy movement and secured positioning.

It is built out of steel construction, has a powder coat finish, and is built in the USA!

COMBO ACCESSORY RACK

SKU: LK5300CB

The Lift King Combo Accessory Rack is a great way to store Light and Heavy Duty Accessories for the Lift King Main Component. This product will help conserve space and keep equipment organized.

This rack is equipped with four swivel brake casters that make relocating Lift King Accessories anywhere in the shop an easy task.

This Rack Stores:

- 1 x Box Attachment
- 1 x Bushing Kit Set
- 1 x Semi Hood Attachment
- 1 x Fifth Wheel Attachment

CUSTOM ACCESSORY RACK

SKU: CUS1000

The Custom Accessory Rack is designed to customer's specifications to store any Lift King Accessories.

Price: determined based on the selected options and design.
